EnEarth Launches Market Test for CO_2 Injection and Storage Capacity at Prinos

Stage 1 (Non-Binding Stage) opens for prospective users from Greece and across Europe to express interest in future CO_2 injection and storage capacity.

Athens, 24 November 2026

EnEarth Greece Single Member S.A. ("EnEarth"), developer and operator of the Prinos CO_2 Storage Facility in Northern Greece, announces the launch of the Market Test for CO_2 injection and storage capacity at Prinos, commencing with Stage 1 (Non-Binding Stage).

The Market Test provides an open, transparent and non-discriminatory process for prospective users seeking access to future CO_2 injection and storage capacity. The initial Non-Binding Stage enables interested parties to register and submit non-binding capacity requests and, following admission, engage in structured cooperation with EnEarth in preparation for the subsequent Binding Stage.

The process is conducted in accordance with Article 27 of Law 5261/2025 and the applicable regulatory framework, including the Market Test Guidelines approved by the Regulatory Authority for Waste, Energy and Water (RAAEY), Decision E-30/2026 (Government Gazette B' 775/16.02.2026) and the Stage 1- Market Test Notification (the “Stage 1-Notification”) approved by RAAEY Decision E-268/2026 (Government Gazette B’ 6822/13.11.2026).

Invitation to prospective users

EnEarth invites industrial CO_2 emitters, aggregators, intermediaries, transport project developers and other eligible entities involved in CO_2 capture and transportation to participate in Stage-1 of the Market Test.

The Market Test welcomes eligible interested parties, including parties from Greece and other EU Member States and those developing cross-border CO_2 transport and storage solutions. Projects at different stages of development may participate, including entities representing multiple CO_2 sources, in accordance with the eligibility requirements of the Stage-1 Notification.

Interested parties are invited to register their participation and submit a complete Stage 1 Submission Package, including a Non-Binding Capacity Request specifying indicative CO_2

volumes, delivery profiles, project timelines and relevant technical characteristics, in accordance with the official Stage 1 Notification.

A structured pathway towards binding capacity allocation

The Market Test consists of two (2) sequential stages, designed to facilitate progression from preliminary market interest to binding contractual arrangements.

During Stage-1 (Non-Binding Stage), interested parties register and submit a complete Stage 1 Submission Package, including a Non-Binding Capacity Request and the required supporting documentation. Following a procedural completeness review, admitted participants will be invited to enter into Joint Development Agreements (JDAs) with EnEarth.

The JDA establishes a structured framework for technical, operational and commercial cooperation, facilitating alignment between prospective CO_2 capture and transport projects and the Prinos CO_2 Storage Facility, including indicative capacity requirements, delivery arrangements and project timelines, in preparation for the subsequent Binding Stage.

Participation in Stage-1 and execution of a JDA constitute procedural prerequisites for eligibility to participate in Stage-2 (Binding Stage), in accordance with the applicable regulatory framework.

Stage-2 will provide for the submission of binding offers for CO_2 injection and storage capacity and the potential execution of Access Contracts, subject to the applicable regulatory requirements and capacity allocation procedures.

Participation in Stage-1 does not constitute a reservation or allocation of CO_2 storage capacity, nor does it confer any preferential rights or priority in subsequent capacity allocation.

Participation procedure and key dates

Interested parties wishing to participate in Stage 1 must submit a complete Stage 1 Submission Package, comprising the prescribed Registration Form, Non-Binding Capacity Request, Confidentiality Agreement, Solemn Declaration and all other supporting documentation required under the official Stage 1 Notification and its Annexes.

Participation is subject to payment of a non-refundable Participation Fee of EUR 10,000 (exclusive of VAT, if applicable), which constitutes a condition for admissibility of the Stage 1 Submission Package, in accordance with the Stage 1- Notification.

The key milestones and deadlines governing the Non-Binding Stage of the Market Test are set out below. All dates and times are subject to the provisions of the official Stage 1-Notification.
